» Profile Summary

Bachelor of Engineering in Computer Science with a strong foundation in software engineering and full-stack web development. Proficient in JavaScript, React.js, Node.js, Express.js, MongoDB, HTML, and CSS, with hands-on experience developing and deploying scalable web applications and REST APIs. Familiar with software development lifecycle (SDLC), object-oriented programming concepts, database management, and version control using Git. Strong analytical, problem-solving, communication, and teamwork skills with a commitment to continuous learning and building high-quality software solutions.

» Technical Skills

- **Languages:** JavaScript, Python
- **Frontend:** React.js, HTML5, CSS3, JavaScript (ES6+), Responsive Web Design, UI/UX Implementation, Cross-Browser Compatibility
- **Backend:** Node.js, Express.js, REST API Development
- **Database:** MongoDB, Mongoose ODM
- **Tools:** Git, GitHub, Postman, VS Code, Netlify, Render
- **Concepts:** JWT Authentication, Role-Based Access Control (RBAC), MVC Architecture, CRUD Operations, API Integration, Error Handling, Website Performance Optimization, ERP Application Development, Object-Oriented Programming (OOP), Software Development Life Cycle (SDLC)

» Project Experience

Online Book Reading Platform (June 2023 – July 2023) <https://ilm-kosh.netlify.app>

- Developed REST APIs for user authentication and book management.
- Developed and tested scalable web applications following software engineering best practices
- Implemented secure login and signup functionality using JWT authentication and role-based access control.
- Designed CRUD operations for managing books and user data with MongoDB and Mongoose.
- Integrated frontend and backend using Axios for API communication.
- Managed source code using Git and GitHub for version control.
- Deployed frontend on Netlify and backend on Render with environment configuration for production.

Service Marketplace Platform (March 2026 – May 2026) <https://task-iva.netlify.app/>

- Developed an ERP-style MERN stack platform connecting customers, service providers, and administrators through a centralized management system.
- Built role-based dashboards for users, service providers, and administrators with secure JWT authentication and authorization.
- Implemented service provider onboarding, profile management, service tracking, and workflow management modules.
- Developed RESTful APIs using Node.js, Express.js, and MongoDB to manage business operations and platform data.
- Created reusable React components and a modular frontend architecture to improve maintainability and scalability.
- Designed responsive user interfaces using CSS Flexbox and Grid for a seamless cross-device experience.
- Integrated AI-assisted service categorization and recommendation features to enhance user engagement.
- Optimized application routing, API performance, and database operations for improved scalability and user experience.
- **Tech Stack:** React.js, Node.js, Express.js, MongoDB, JWT, REST APIs, Tailwind CSS, Git, Postman

» Education History

- **Bachelor of Engineering in Computer Science Engineering (July 2022– june2026)**
Chitkara University
- **Senior Secondary (Class XII) – CBSE (2021– 2022)**
Saraswati Vidhya Mandir
